

November 13, 2014

Dear Citizens:

The City of Corsicana has launched a new mobile app. This new tool will empower the citizens to become involved in improving the community by reporting litter, tall grass, potholes and many other issues that may need attention. Citizens can report to the city a concern using the mobile app and the **"Report a Concern"** link. The mobile app will make it easy to include photos along with details as a problem is being reported. In addition, the app contains links to the City website to make the website user-friendly for residents and visitors seeking information about the city. Important phone numbers are listed and will auto-dial with a touch. The app will work in conjunction with the website, making information available via smart phone 24 hours a day. The "City of Corsicana" app is now available online for free download for Apple and Android phones.

Sincerely,

Chuck McClanahan  
Mayor
